Projects

Crypto Exchange Platform

Digital Code | May 2023 - Present

<https://www.bitnasdaq.com>

Tools: VueJs, Ant Design

A **Crypto Exchange Platform** that enables users to trade, convert, and manage cryptocurrencies seamlessly. The platform supports advanced trading features like **Spot Trading**, **Margin Trading**, and **Futures Perpetual Trading**, along with secure P2P transactions and real-time market data integration. Designed with a focus on scalability and user experience, the platform caters to both novice and experienced traders.

My Role and Contributions

- Led the development of the **Advanced Trading Modules** and **P2P Trading** features.
- Integrated **WebSocket** for real-time market data and trading updates.
- Designed and implemented the **User Dashboard** using **Ant Design** for a clean and intuitive UI.
- Collaborated with the backend team to ensure secure and efficient API integrations.
- Help in the deployment of the platform on **AWS** for scalability and reliability.

LamaGogo

Freelancing | Mar 2022 - Sep 2022

Tools: Laravel, VueJs(InertiaJs),AWS

This is a hospitality project to manage pets in the US based on the multi-vendor system. This is my client and I work independently to complete this project. The major modules are the following.

- 1) Pet registration and reservations
- 2) Role/User Management
- 3) Payments

- 4) Calender Base View
- 5) Dorm Rooms

Cuisine512

Freelancing | Apr 2021 - Jun 2021

Tools: NodeJs (AdonisJs) , VueJs

This is food delivery app. I worked in a team and lead this project. Following are my key roles in this project.

- Assign task to other team members
- Help back-end developer to design database and business logic
- Front-end development

Finanspan

Freelancing | Mar 2021 - Apr 2021

Tools: Laravel, PHP, Git, JQuery

Finaspan is currency exchange banking type app. I work in a team in this project. Following are main modules:..

- Add profiler
- Assign beneficiary to profiler
- Beneficiary have only single profiler but profiler could have multiple beneficiaries with single primary beneficiary
- Perform daily transaction
- Maintain record of each transaction against profiler
- User Management
 - Roles
 - Permission

I worked on transactions part in this project and help backend developers to design DB and backend logic

E-Auction

Freelancing | Jan 2021 - Feb 2021

Tools: Laravel, PHP, Git, JQuery

This is developed by Kohat Board and Di-Khan Board of KPK. Following are the features of this project.

- Auction form of different items is generated from board
- Local companies quote rate against each item
- Minimum rate quote by company is highlighted to board
- Rates are stored in DB in encrypted form

E-Bidding System

Freelancing | Nov 2020 - Dec 2020

Tools: Laravel, PHP, Git, JQuery

EBidding system is for all KPK's boards. Firstly developed by **Kohat Board** then it is developed from Mardan Board, Bannu Board and Di-Khan Board. This project was completely developed by me. Following were the core features of this system:..

- Tender form is generated from board
- Local companies provide their technical detail e.g FBR certificate
- Each company quote rates against each item of tender
- System highlight the max rate against each item of tender
- Board close the tender and issue opening date
- Board can mark as In-Eligible to any company

School Management System

Freelancing | Sep 2020 - Oct 2020

Tools: PHP, Laravel

Complete school management system design for local client. In this system I work in a team and work on major modules of this project. This project contain following modules.

- Student's Admission
- Managing School Expense
- Creating Exam with Date Sheet
- Promote Students
- Fee Collection
- User Management
 - Roles
 - Permissions

I worked on School Expense, Class promotion, Fee Collection in this project

Jdm-Trading

Freelancing | Aug 2020 - Sep 2020

jdm-trading.com

Tools: Laravel, PHP, Git, JQuery

In this project categories wise stock is added from back-end panel and display on website. Customer after creating account place order and track it from dashboard.

Following are my responsibilities in this project

- Design Database Table's Structure
- Design and develop complete website

ZDigi Promo

Freelancing | May 2020 - Jun 2020

<http://zdigipromo.com>

Tools: Laravel, PHP, Git, VueJs

Zdigi Promo is advertising app. I work in a team. This app is developed in PHP Laravel and VueJs. Key role was to.

- manage DB with backend developer
- develop front-end side of this app in vue js
