PROFILE

Senior Laravel + Vue/Nuxt developer with 6+ years of experience, including 3 years leading engineering teams. I design and build multi-tenant SaaS end to end: Laravel APIs, financial and operational data models, Nuxt.js/Vue.js front-ends and AWS infrastructure. I currently run two production SaaS products solo: a Japan–UK vehicle export platform with OpenAI document extraction, and a transport accounting app on web, Windows and Android with offline sync and 778+ automated tests. Available immediately; remote, or relocation with visa sponsorship.

CORE SKILLS

Backend: PHP 8, Laravel 12, MySQL, REST APIs, GraphQL, Sanctum, Multi-tenancy, Queues + Horizon, Spatie RBAC, Audit trails

Frontend: Vue 3, Nuxt 4, TypeScript, Pinia, Tailwind CSS, SSR, WebSockets

AI: OpenAI API, Structured outputs (JSON schema), Document extraction, Cost + token tracking

Data & cloud: PostgreSQL, DynamoDB, OpenSearch, AWS EC2 / RDS / S3, Lambda, AppSync, Cloudflare R2

Quality & delivery: Pest, PHPUnit, Vitest, Playwright, Docker, GitHub Actions, Code review

Multi-platform: Tauri, Capacitor, IndexedDB, Offline sync, PDF generation, Excel/CSV

EXPERIENCE

Freelance Full-Stack Laravel Developer

2023 — PRESENT

Self-employed

Full-time freelance since May 2026. I build and run production SaaS products end to end.

- Japan–UK vehicle export SaaS in production, with OpenAI document extraction
- Munshi Wala: multi-tenant transport accounting SaaS on web, Windows and Android
- Pluto Pakistan: multi-vendor marketplace, built and launched solo

Full-Stack Developer & Web Team Lead

MAY 2023 — APR 2026

Digital Code Private Limited · Islamabad

Led the web frontend of a live crypto exchange and built its serverless AWS chat.

- 5 trading modules: Spot, Margin, Futures, P2P, Copy Trade
- TradingView + WebSocket real-time UI
- Reviewed all frontend code and mentored junior developers

Senior Full-Stack Developer

SEP 2022 — APR 2023

Signup Solution Pvt Ltd · Islamabad

Built a Laravel admin panel and a Nuxt.js guest app for a hotel management SaaS.

- Reworked invoice generation and fixed recurring billing errors
- Hotel-level and user-level role-based access
- AWS EC2, RDS and S3

Full-Stack Software Engineer & Team Lead

JUN 2021 — SEP 2022

Procurosis Pvt Ltd · Islamabad

Led the team building a commercial B2B procurement SaaS, and built hands-on across the stack.

- Multi-tenant architecture and 5 subscription tiers
- Quotation and purchase-order workflows
- Real-time chat with Laravel Echo

Software Engineer

JUN 2020 — MAY 2021

Global Gateway Services · Islamabad

Delivered client software for public-sector bidding, auctions and currency exchange.

- 6 projects in 12 months
- E-Bidding / E-Auction adopted by 4 KPK education boards
- Owned client meetings through to deployment

SELECTED PROJECTS

Japan–UK Vehicle Exporter SaaS

Solo production build: Laravel API, two Nuxt.js SSR apps, customer portal, multi-tenant RBAC, vehicle/shipping lifecycle, JPY/GBP finance, PDF invoices, and OpenAI extraction of auction sheets and Bills of Lading (strict JSON schema, matching against existing vehicles, user confirmation, per-request cost logging).

Munshi Wala

Own multi-tenant transport accounting SaaS for web, Windows and Android with offline-first sync, double-entry ledger, partnership accounting, 15+ PDF reports, English/Urdu localization and 778+ Pest tests.

Real-Time Crypto Exchange

Led web engineering across 5 trading modules, including TradingView charts and WebSocket market feeds; built serverless AWS chat with AppSync, Lambda, DynamoDB and GraphQL.

EDUCATION

BS Computer Science — Federal Urdu University of Arts, Sciences and Technology, Islamabad · 2020
