EDUCATION

BS Computer Science

Federal Urdu University of Arts, Sciences
& Technology, Islamabad

2020 - GPA 3.0

LANGUAGES

Urdu Native
English Professional

Results-driven Senior Full Stack Developer with **6+ years** of experience delivering scalable web applications across fintech, blockchain, hospitality, transport, and e-government domains. Proven track record leading Vue.js / Nuxt.js frontend teams, architecting Laravel REST APIs, and managing AWS infrastructure including EC2, Amplify, Lambda, and DynamoDB. Built a WhatsApp-style real-time chat system and led crypto exchange frontend delivery at BNQ Global. Operated as sole developer on multiple end-to-end SaaS products and uses AI-assisted development tools to accelerate delivery.

EXPERIENCE

Senior Frontend Developer & Web Team Lead

May 2023 - Present

Digital Code Pvt Ltd - Islamabad

- Lead frontend team on BNQ Global, a live crypto exchange with Spot, Margin, P2P, Copy Trade, and Futures Perpetual trading.
- Built Advanced Trading View module integrating TradingView charting with real-time WebSocket order-book and price feeds.
- Architected a WhatsApp-style real-time chat system via AWS Lambda and DynamoDB supporting 1-1 chat, private/public groups, communities, and verified groups.
- Delivered P2P Trading module end-to-end: order matching UI, escrow status flows, and dispute management screens.
- Implemented Copy Trade feature allowing users to mirror experienced traders in real time.
- Used AWS Amplify for hosting/CD, DynamoDB for low-latency data, and Lambda for serverless backend functions.

Full Stack Developer - Sole Engineer

2022 - 2024

Pluto Pakistan - Remote

- Solely responsible for the full technical stack of plutopakistan.com: Vue.js frontend, Laravel REST API backend, and server infrastructure.
- Managed deployments across Namecheap and AWS, including DNS, SSL, and release pipelines.
- Project paused due to client budget constraints; codebase and infrastructure were fully handed over.

Full Stack Developer - Solo Build

2024 - Present

Vehicle Owner Local Transport System - Islamabad

- Designed and built a multi-tenant SaaS platform for local goods transport businesses using Laravel 12, Nuxt 4, MySQL, and Tailwind CSS.
- Implemented strict multi-tenancy with complete data isolation per tenant, role-based access, and subscription plan enforcement.
- Built a double-entry ledger/accounting backbone with financial locks and approval workflows covering vouchers, fuel entries, salary advances, and settlements.
- Developed core operations modules for vehicles, drivers, conductors, customers, partners with ownership share history, and document uploads.
- Added Urdu RTL + English l18n, Dark/Light/System theming with tenant brand colors, and report/export foundations.

Senior Full Stack Developer

Sep 2022 - Apr 2023

Signup Solution Pvt Ltd - Islamabad

- Developed core modules of a Hotel Management SaaS: Bookings & Billing, Analytics Dashboard, Dynamic Services, and multi-level access control.
- Designed RESTful APIs in Laravel consumed by a Vue.js SPA and re-architected invoice generation logic to eliminate billing errors.

Full Stack Engineer & Team Lead

Jun 2021 - Sep 2022

Procurosis Pvt Ltd - Islamabad

- Led development of a multi-tenant B2B procurement SaaS covering RFQ, quotation, real-time chat, and Purchase Order generation.
- Architected multi-tier subscription model from Free to Enterprise and managed a team of 5 engineers on AWS EC2 and Route 53.

Software Engineer

Jun 2020 - May 2021

Global Gateway Services - Islamabad

- Sole developer of E-Bidding and E-Auction systems deployed across 4 KPK government boards: Kohat, Mardan, Bannu, and D.I. Khan.
- Built tender form generation, company rate quoting, max-rate highlighting, tender closing, and ineligibility marking.

- Delivered 6 client projects on schedule including Finanspan, ZDigi Promo, and JDM-Trading e-commerce.

● NOTABLE PROJECTS
