

SALAH UD DIN

Senior Full Stack Developer | Vue.js / Nuxt.js / Laravel / AWS

Location: Islamabad, Pakistan | Phone: +923437239678 | Email: msayubi76@gmail.com

Portfolio: salahuddin.pk | LinkedIn: linkedin.com/in/msayubi76

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 6+ years of experience delivering scalable web applications across fintech, blockchain, hospitality, transport, and e-government domains. Proven track record leading Vue.js / Nuxt.js frontend teams, architecting Laravel REST APIs, and managing AWS infrastructure (EC2, Lambda, DynamoDB, Amplify, AppSync, Cognito, SES, IAM, CloudFormation, Route 53). Built a WhatsApp-style real-time chat system and led frontend development of a confidential crypto exchange platform. Experienced in Agile/SCRUM environments with strong Git skills (GitHub and GitLab). Operated as sole developer on multiple end-to-end SaaS products. Leverages AI-assisted development (Claude, ChatGPT, Codex) to accelerate delivery.

CORE SKILLS

Frontend: Vue.js, Nuxt.js (v2/v3/v4), Vue.js v3 (Composition API), JavaScript ES6+, Tailwind CSS, Ant Design, Bootstrap, Inertia.js

Backend: Laravel (5.8-12), PHP 8.x+, REST APIs, Sanctum Auth, MySQL

AWS: EC2, Lambda, DynamoDB, Amplify, AppSync, Cognito, SES, IAM, CloudFormation, Route 53

Tools: Git (GitHub / GitLab), GitHub Actions, CI/CD, WebSocket, Jira, Agile / SCRUM, Multi-tenant SaaS Architecture

AI Tools: Claude, ChatGPT, Codex

PROFESSIONAL EXPERIENCE

Senior Frontend Developer & Web Team Lead | Digital Code Pvt Ltd

Islamabad, Pakistan | May 2023 - Present

- Lead frontend team on a Confidential Crypto Exchange Platform supporting Spot, Margin, P2P, Copy Trade, and Futures Perpetual trading in an Agile/SCRUM environment.
- Built Advanced Trading View module integrating TradingView charting with real-time WebSocket order-book and price feeds.
- Architected a WhatsApp-style real-time chat via AWS Lambda and DynamoDB supporting 1-1 chat, private/public groups, communities, and verified groups.
- Delivered P2P Trading module end-to-end: order matching UI, escrow status flows, and dispute management screens.
- Implemented Copy Trade feature allowing users to mirror experienced traders in real time.
- Leveraged AWS services: Amplify (hosting/CD), Lambda (serverless), DynamoDB (low-latency data), AppSync (GraphQL API), Cognito (auth), SES (email), IAM (access control), and CloudFormation (infrastructure as code).

Full Stack Developer - Sole Engineer | Pluto Pakistan

Remote | 2022 - 2025

- Solely responsible for entire technical stack of plutopakistan.com: Vue.js frontend, Laravel REST API, and server infrastructure.
- Managed deployments across Namecheap and AWS; handled DNS, SSL, and release pipelines independently.
- Project paused due to client budget constraints; codebase and infrastructure fully handed over.

Full Stack Developer - Solo Build | Vehicle Owner Local Transport System

Islamabad, Pakistan | 2024 - Present

- Designed and built a multi-tenant SaaS platform for local goods transport businesses using Laravel, Nuxt 4, MySQL, and Tailwind CSS.

- Implemented strict multi-tenancy with complete data isolation per tenant, role-based access (Super Admin / Group Admin), and subscription plan enforcement.
- Built a double-entry ledger/accounting backbone with financial locks and approval workflows covering vouchers, fuel entries, emergency fuel, salary advances, and settlements.
- Developed core operations: vehicles, drivers, conductors, customers, partners with ownership share history, and document uploads.
- Added Urdu (RTL) and English i18n, Dark/Light/System theming with tenant brand colors, and report/export foundations.

Senior Full Stack Developer | Signup Solution Pvt Ltd

Islamabad, Pakistan | Sep 2022 - Apr 2023

- Developed core modules of a Hotel Management SaaS using Jira/SCRUM methodology: Bookings and Billing, Analytics Dashboard, Dynamic Services, and multi-level access control.
- Designed RESTful APIs in Laravel consumed by a Vue.js SPA; re-architected invoice generation to eliminate billing errors.

Full Stack Engineer & Team Lead | Procurosis Pvt Ltd

Islamabad, Pakistan | Jun 2021 - Sep 2022

- Led development of a multi-tenant B2B procurement SaaS in Agile/SCRUM sprints covering RFQ, quotation, real-time chat, and Purchase Order generation.
- Architected multi-tier subscription model (Free to Enterprise); managed team of 5 engineers on AWS EC2 and Route 53.

Software Engineer | Global Gateway Services

Islamabad, Pakistan | Jun 2020 - May 2021

- Sole developer of E-Bidding and E-Auction systems across 4 KPK government boards (Kohat, Mardan, Bannu, Di-Khan).
- Built tender form generation, company rate quoting, max-rate highlighting, tender closing, and in-eligibility marking.
- Delivered 6 client projects on schedule: Finanspan (fintech), ZDigi Promo, JDM-Trading business management system, and more.

NOTABLE PROJECTS

Confidential Crypto Exchange Platform | Vue.js, Ant Design, WebSocket, AWS Lambda, DynamoDB, Amplify

- Full-featured crypto exchange with Spot, Margin, P2P, Copy Trade, and Futures Perpetual trading.
- WhatsApp-style real-time chat (1-1, private groups, public groups, communities, verified groups) via Lambda and DynamoDB.
- TradingView integration with live WebSocket feeds and responsive Ant Design dashboard.

Pluto Pakistan - Full Stack Solo Project | Laravel, Vue.js, MySQL, AWS, Namecheap

<https://salahuddin.pk/projects/pluto-pakistan>

- Sole engineer for plutopakistan.com - owned frontend, backend API, and full server infrastructure.
- Managed multi-environment deployments on Namecheap and AWS independently.

Vehicle Owner Local Transport System - SaaS | Laravel, Nuxt 4, MySQL, Tailwind CSS, PHP 8.x

- Multi-tenant SaaS with data isolation, role-based access, and subscription enforcement.
- Double-entry ledger backbone, voucher/trip system, fuel tracking, salary advances and settlements.
- Urdu RTL and English i18n, Dark/Light/System themes with tenant brand colors.

Procurosis - B2B Procurement SaaS | Laravel, Vue.js, MySQL, AWS EC2

<https://salahuddin.pk/projects/e-procurement>

- Multi-tenant vendor-buyer RFQ, quotation, real-time chat, and PO generation platform.
- Led team of 5 engineers; managed AWS EC2, Route 53, and full deployment pipeline.

E-Bidding / E-Auction - KPK Government Boards | Laravel, PHP, jQuery

- Sole developer for tender management systems across 4 KPK government boards.
- Tender form generation, company rate quoting, max-rate highlighting, and in-eligibility marking.

LamaGogo - Pet Hospitality Platform (US Market) | Laravel, Vue.js (Inertia.js), AWS

- Multi-vendor pet boarding/daycare platform: registrations, reservations, payments, and calendar-based dorm availability.

JDM Trading - Business Management System | Laravel, PHP, jQuery

<https://salahuddin.pk/projects/jdm-trading>

- Company vehicle showcase website with backend panel to manage products, sales, and partner details.
- Designed full database structure and developed the complete system end-to-end.

School Management System | Laravel, PHP, GitHub Actions

<https://salahuddin.pk/projects/school-management>

- Complete school management system covering admissions, fee collection, exam scheduling, class promotion, and expense management.
- Implemented CI/CD pipeline using GitHub Actions for automated deployment.
- Role-based access with user management and permissions.
